

figures the NAB would try to shut down something they can't control. I enjoy satellite radio as it gives me a chance to listen to the style of music and listen to the news, sports and other shows I enjoy. If I'm forced to return to listening to the low talented over censored entertainment on free broadcasting I guess even freedom to buy a service is gone. It's a sad day in a America that to get First Amendent Rights you have to pay to get them. This for you NAB maybe someone should take a lawsuit against you and shut you down and or censor you. XM keep up the fight and good luck I enjoy the service very much and want to keep my service.

Sincerely,

Mr. Daryl C. Beam
